Each letter is assigned a comment number. Within each letter, each comment or issue is bracketed and assigned a letter code. Responses to those comments are assigned the same letter code, and are provided next to the corresponding comment. Comments and responses are organized by federal agencies, state agencies, special interest groups, and individuals.

It is important to note that to avoid repetition, responses have been prepared for each specific comment. Where comments are similar between different commentors, responses are referenced back to the initial common response, or to specific sections of the DEIS. Where appropriate, responses to selected comments have been referenced ahead to the supplemental information provided in Chapter 2; or to Volume II, Mitigation Plan; Appendix A, USFWS Compatibility Determination; or Appendix B, USACE Draft Section 404(b)(1) Evaluation.
